

Dear Patient,

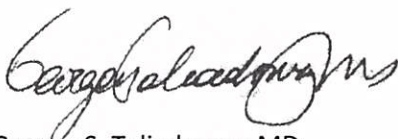

After 30 years of providing infertility treatment to the community, I will be retiring this Spring 2024.

Since I have not secured continuation of your care at DVIF&G, I am advising all patients to obtain your medical records and transfer your care to one of the other fertility clinics in our area.

I would like to take this opportunity to thank you for entrusting your care to DVIF&G, and our dedicated staff who has consistently prioritized your safety and interest. We wish you good luck and success with your future treatment.

You may access your patient records through the online portal.

Sincerely

George S. Taliadouros MD

Delaware Valley Institute of Fertility & Genetics
